Book Description

Short Blurb (90 words)

Sherlock Bone & Scotty Watson: The Mystery of the Missing Blue Suede Shoes is an interactive forensic science adventure for young detectives aged 7-11. When a prized pair of blue suede shoes vanishes before Bonesville's Summer Festival, Sherlock Bone and his faithful Scottish Terrier, Scotty Watson, must follow the evidence, analyse fingerprints, eliminate suspects, and uncover the truth. Packed with hands-on experiments, detective challenges, and real forensic science, readers are invited to become Junior Detectives themselves and use their own investigative skills to crack the case alongside Sherlock and Scotty.

Long Blurb (254 words)

Sherlock Bone & Scotty Watson: The Mystery of the Missing Blue Suede Shoes. A crime has shaken the quiet village of Bonesville, and Sherlock Bone needs a Junior Detective to help follow the evidence, eliminate suspects, and solve the case!

Preparations for the annual Bonesville Summer Festival are in full swing. Fairground rides are spinning, music fills the air, and visitors have travelled from across the country to enjoy the celebrations. But excitement quickly turns to concern when a prized pair of blue suede shoes mysteriously disappears, leaving behind a trail of clues and a growing list of suspects.

Can fingerprints reveal the culprit? Which suspects can be eliminated? And will Sherlock Bone and his loyal Scottish Terrier, Scotty Watson, uncover the truth before the mystery remains unsolved forever?

Join the detective duo on an immersive forensic adventure that invites readers to become active investigators. Examine fingerprint evidence, compare ridge

characteristics, analyse clues, eliminate suspects, and use scientific thinking to crack the case alongside Sherlock and Scotty.

Packed with fascinating facts, the history of fingerprint identification, hands-on experiments, and Junior Detective challenges, Sherlock Bone & Scotty Watson: The Mystery of the Missing Blue Suede Shoes combines storytelling, science, history, and culture to inspire curiosity and develop problem-solving skills.

Perfect for budding detectives, curious minds, and young scientists, this unique interactive mystery encourages readers to think critically, investigate evidence, and discover that science can be exciting, accessible, and fun.

Will you follow the evidence, crack the case, and earn your place as a Junior Detective?

Author Biography

Short Bio (73 words)

Dany Green is a lecturer in forensic science specialising in biological anthropology and a registered STEM Ambassador. For over 19 years, she has inspired learners through hands-on forensic science workshops across the UK. She created Sherlock Bone and Scotty Watson to combine storytelling, science and detective work, encouraging young readers to explore forensic investigation, develop critical thinking skills, and discover the excitement of STEM through immersive mysteries and experiments.

Medium Bio (157 words)

Dany Green is a lecturer in forensic science specialising in biological anthropology, with a passion for inspiring curiosity and enthusiasm for science in young people. For more than 19 years, she has delivered engaging forensic science workshops to thousands of learners across the UK, helping them discover how scientific thinking can be used to solve mysteries and understand the world around them.

As a registered STEM Ambassador, Dany is committed to making science accessible, exciting, and fun. She created the characters of Sherlock Bone and Scotty Watson to bring the fascinating world of forensic investigation into homes and classrooms through interactive mysteries, hands-on experiments, and evidence-based challenges.

The Sherlock Bone & Scotty Watson series combines storytelling, science, history, and culture, encouraging young readers to think critically, analyse evidence, and become Junior Detectives themselves. When she isn't teaching, writing, or developing new adventures, Dany enjoys gardening, exploring local history, and spending time with her beloved Scotty and Westie.

Full Bio (275 words)

Dany Green is a lecturer in forensic science specialising in biological anthropology and has spent more than 19 years inspiring learners of all ages to discover the excitement and possibilities within science. Passionate about making scientific concepts engaging, accessible, and memorable, she has delivered thousands of hands-on workshops

across the UK, introducing young people to the fascinating world of forensic investigation and demonstrating how science can be used to solve mysteries, answer questions, and understand the evidence hidden all around us.

In 2007, Dany founded Sherlock Bone, a company dedicated to providing innovative science-based workshops that encourage teamwork, creativity, communication, confidence, and problem-solving skills. Through immersive practical activities, learners have explored the application of science within forensic investigations while developing a lifelong curiosity for STEM subjects.

As a registered STEM Ambassador, Dany is committed to promoting Science, Technology, Engineering and Mathematics and helping young people recognise the opportunities these subjects can provide. Inspired by years of teaching and outreach work, she created the characters of Sherlock Bone and Scotty Watson to bring the excitement of forensic science into homes and classrooms around the world.

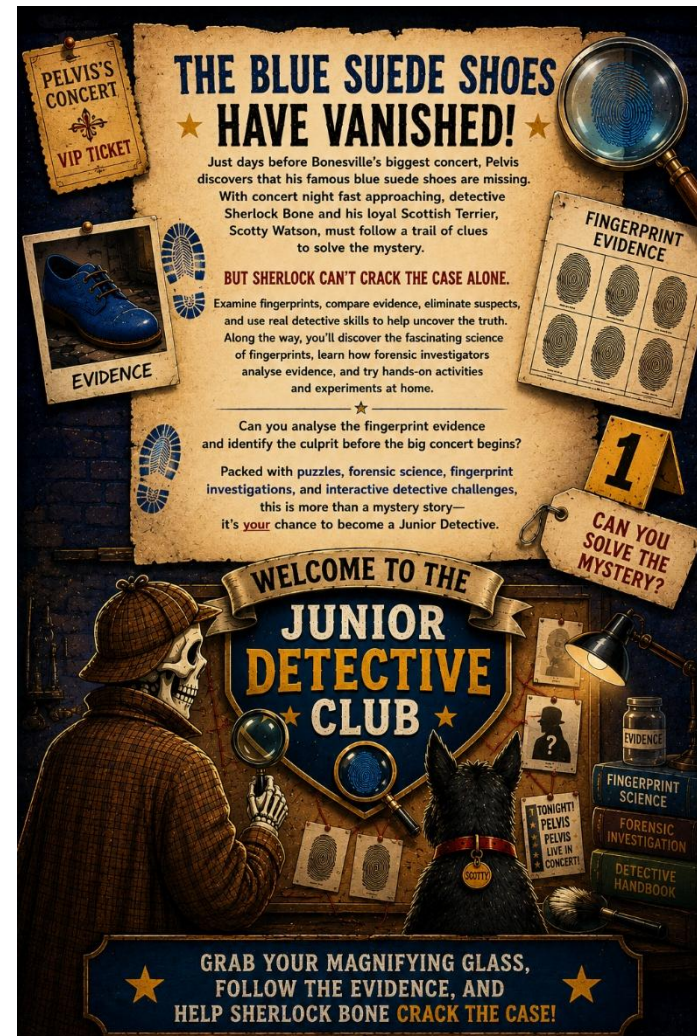

The Sherlock Bone & Scotty Watson series combines storytelling, history, culture, and real forensic techniques to create interactive mysteries that invite readers to become Junior Detectives themselves. Through fingerprint analysis, evidence examination, home experiments, and detective challenges, children are encouraged to think critically, analyse clues, and experience the thrill of scientific discovery while solving the mysteries hidden within the pages.

When she isn't teaching, writing, or creating new adventures for Sherlock and Scotty, Dany enjoys gardening, exploring local history, researching unusual mysteries, and spending time with her beloved Scotty and Westie.
